## New Look 7525 Series Automatic Changeover Regulators

The 7525B34 and 7525B4 have a new look! The high pressure changeover regulator portion has been redesigned to incorporate some new features.

### Application

The combination automatic changeover/ second stage regulator are suitable for homes, mobile homes, cottages, construction and other portable cylinder installations where at two cylinders are required. The empty container can be replaced without interrupting gas service.

### Features

- The changeover switches from “service” to “reserve” automatically when the service cylinder is empty without interrupting gas service.
- Integral gauge will turn red when the service cylinder is empty which indicates that the cylinder needs to be replaced.
- Knob is integral to high pressure changeover regulator.
- Allows “reserve” cylinder to supplement gas flow to the “service” cylinder at extreme loads or extreme cold weather conditions.
- The second stage regulator incorporates a drip lip bonnet designed to protect against freeze ups when properly installed.
- Select Brown finish on the second stage regulators.
