Product Information Bulletin – New 3/8" NPT Plug replaces 1/4" NPT Plug

Please be advised we are changing the access Plug on our new A3213D & DT series to a 3/8" NPT from the 1/4" NPT. This will provide better access to remove the head cap screw/washer and cam from the valve outlet when servicing the valve. The photos below provide a visual of what the new valves look like.

Should you have any questions, please contact RegO at 336-449-7707.

New RegO Blue Coating

Old Coating

New 3/8" NPT Plug
